

## Solution - Candle Clue

The Regular division received a 12" candle at the Daisylaps site, together with a 100 cm (40") paper tape measure from IKEA.

This tape measure was marked with inches on the top half, and with centimeters on the bottom half. On the inch measure, the following numbers were written in pink above these inch measurements:

1"	3,6
3"	5
4"	8
5"	10
12"	9
14"	7
16"	4
18"	2
23"	1

The numbers provide the ordering, and the inches provide the letters:

1	2	3	4	5	6	7	8	9	10
W	R	A	P	C	A	N	D	L	E
23"	18"	1"	16"	3"	1"	14"	4"	12"	5"

Next, there are black numbers written at intervals along the centimeter measure.

When the tape measure is wrapped around the candle in a downward spiral, the black letters read (in three spiral columns):

**GO TO WAXEN MOON CANDLE ON POLK ST**

If anybody wraps from the bottom up, they'll see **WRONG END** written in purple letters in two columns.
