

The version of the clue linked on the web site is probably an earlier version of the Masters-level clue, leading to a different location. This document gives the correct solution to the actual final Regular clue.

Assemble the 28 paper strips into a photograph and securely tape together the pieces, then turn it over. You will see what looks like 6 thick strips that need to be reassembled. Cut these apart and reassemble them into a chick. Complete the maze, then read the letters in the maze to get the solution.

EAST END OF PENGUIN ISLAND AT SF ZOO
